

## PCEye

### Assistive eye tracking

PCEye is the world's most advanced assistive eye tracker. It enables people with physical disabilities to use a Windows tablet, laptop or monitor up to 27" with just their eyes, even outdoors in bright light.

\*Tablet and bracket pictured above are sold separately.

#### Eye control

Replace a keyboard and mouse with your eyes to control a Windows computer.

#### Outdoor eye tracking

Access everything on your computer, even while outdoors.

#### Flexible

Use seamlessly with most Windows devices, on screens up to 27" in size.

#### Portable

Attach easily to a Windows device and take it with you anywhere.

## Control a computer with your eyes

Replace a traditional keyboard and mouse with your eyes and surf the web, connect on social media, play games, create documents and more. Simply connect PCEye to your Windows device via USB and access everything your computer has to offer. This eye tracker offers the flexibility to meet different needs throughout the day. Use it with a larger-screen computer for gaming, a laptop for meetings or a tablet for pared-down outings.
