

Speech Case

Transform an iPad into an AAC device

Speech Case turns an iPad into a powerful communication device for people with speech and language disabilities. Easy to carry with a built-in handle and stand, this durable case has reinforced corners and a screen-protecting frame to withstand drops.

iPad solution

Transform a 10.2-inch iPad into a durable AAC device.

Durable

Protect against drops thanks to crash corners and a snap-on faceplate.

Communication & durability

Powerful speakers

Make your voice heard loud and clear with integrated speakers.

Portable

Take the device anywhere with a sturdy built-in handle and kickstand.

Better together

Download our symbol-based TD Snap app to your iPad in order to use Speech Case for augmentative and alternative communication.

TD Snap

We recommend adding TD Snap to your Speech Case with iPad. This symbol-supported AAC app enables a path to communication and literacy at any stage of development. Ask us about the SC Tablet; a Speech Case with an iPad pre-loaded with TD Snap and related AAC apps.
