Before installing the keyguard holder, the iPad must be installed in the Speech Case as specified in the Tobii Dynavox Speech Case and SC Tablet Installation Instructions document.

Your Tobii Dynavox Speech Case comes with a keyguard holder that should be installed even if you are not using a keyguard. The keyguard holder stabilizes the iPad inside the Speech Case.
1. Place the optional keyguard on the iPad with the raised edges of the keyguard facing up.

2. Press the keyguard holder onto the Speech Case/iPad/keyguard assembly.

3. When properly positioned, the keyguard holder will snap in place.

4. Wiggle the optional keyguard in a gentle circular motion with your fingers until it locks in place. Your keyguard is now ready to use.
